Fund Performance Review

State Bank of Pakistan announced the Monetary Policy Statement during the month and reduced policy rates by 150 bps to 12%. The decision was in order to bring interest rates in line with the inflation target set for the current fiscal year and continued lower government borrowing from the State Bank of Pakistan. The Consumer Price Index (CPI) has declined from 13.3% in June 2011 to 10.5% in September 2011. The statement also addresses concerns regarding weak private sector credit growth and falling real private investment expenditures. However, SBP has expressed caution on the overstretched fiscal situation and foreign flows.

Reduction in policy rates contributed significantly towards NIT GBF which yielded an annualized return of 15.88% for the month of October 2011, while the benchmark return for the same period was at 10.78%. The current year to date return is 13.18%, whereas the benchmark for the same period is 11.40%.
