## Fund Commentary & Performance Review

The benchmark KMI-30 index posted a return of -10.55% during December, 2018. The market continued on its downward trajectory mainly on account of uncertainty on the economic front. Nervousness persisted on account of the bleak current account situation coupled with lack of clarity regarding the IMF package. Despite pledges from friendly countries for support, market participants remained skeptical about further depreciation of the PKR against the USD, and further increase in interest rates. Political situation also remained murky, adding further to the negative sentiment prevailing in the market. Average volumes stood at 131 million shares during the month, down 34% on a MoM basis. Foreigners remained net sellers to the tune of USD 28 million during the month.

NIT IEF posted a return of -9.37% during the month of December, 2018 as against a benchmark return of -10.55% showing an outperformance of 1.18%.

## Future Outlook

Negotiations with the IMF regarding the bailout package coupled with the developments on the political front will determine the future direction of the market.
