Fund Commentary

The KMI-30 index posted a return of -2.24% during September, 2018. The market continued on its declining trend as investors await clarity on the economic measures to be taken by the government particularly, Pakistan's entry into the IMF program. The supplementary budget announced by the government garnered mixed reaction from the market. Investors also awaited policy action by the SBP on interest rates, which were raised by 100 bps towards the end of the month as a proactive step to curb price pressures, widening external imbalance, and deteriorating fiscal space. Average trading volumes dried up during the month, with an average of 136 million shares traded daily, 28% lower month on month. Foreign selling also continued unabated, creating continuous downward pressure on the market. Foreigners remained net sellers to the tune of USD 58 million during the month. On the Money Market front, market yields increased as SBP further raised policy rate by 100 bps during the month.
