The upsurge in the market during the month was generally dominated by the foreign portfolio inflows (FPI) with net inflows of US\$113mn, taking the total inflows to US\$431mn during the current fiscal year. The macro economic landscape also continued to show improvement as current account deficit for 8MFY10 declined 68% YoY to US\$2.6bn on the back of 22% YoY contraction in trade deficit and robust remittances, which were 18% higher YoY. On the domestic political front introduction of the 18th Amendment bill was a major positive development which also help keep the sentiments of the market bullish. In the bimonthly monetary policy statement on March 27, 2010, SBP maintained its stance that upward adjustment in SBP's policy rate, at this juncture, runs the risk of impeding the still nascent recovery, while a downward adjustment runs the risk of fuelling an already high inflation. Hence, SBP decided to keep the policy rate unchanged at 12.5 percent.</p> <p>During the month of March 2010, the benchmark KSE-100 index increased by 5.40% whereas your Fund's NAV increased by 1.80%, thus, giving an under performance of 3.6%. Similarly, on a YTD basis (July 09 to March 10), the KSE-100 index increased by 42.1% whereas the NAV of your Fund increased by 31.7% showing an under performance of 10.4%. The main reason behind this underperformance is that this upsurge in KSE-100 is mainly driven by few stocks which are heavyweight in the benchmark KSE-100 index whereas NI(UT) Fund is invested in 448 companies, diversified across almost all sectors and not concentrated to few stocks as the benchmark does. But we logically understand that this is a temporary phenomenon and generally stocks held by your Fund are fundamentally strong, we may therefore expect that the Fund will perform better in the future with this rally extending across the board .</p>
