The KSE-100 Index continued its downward trend from where it left off in the previous month with the over all sentiment being dull due to the imposition of CGT starting with effect from 1 July '10. However, the KSE 100 index recovered sharply later in the month on the back of unabated foreign inflows, hopes of early reintroduction of leverage product & better corporate result expectations. On the last trading day of the month, the SBP came up with a surprise move by increasing the policy rate by 50 basis points to 13 percent. The rationale behind the rate hike as stated by the SBP is to mitigate risks to macroeconomic stability; monetary policy has to take lead for containing aggregate demand pressures emanating mainting the month.

Fund Manager	Manzoor Ahmed Although the surprise outcome of the monetary policy by SBP may lead to a negative start to the month of Aug 10, the direction of the broader market would be contingent upon the ongoing result season, flow of fore investments and timely implementation of leverage product.
